CHROMATHERAPY

The origin goes as far back as traditional medicine in India, China and Greece. It is a method of harmonization and natural well-being. Each color corresponds to a vibration with its individual speed, wave length or rhythm. Its influence is as much physical, psychological or emotional and allows our vital energy to reach a level for self-healing.

RED: Stimulates circulatory system, promotes vitality and energy.

ORANGE: Stimulates respiratory and nervous systems, anti-fatigue, benefits body and mind.

YELLOW: Energizes intellectual stimulation, fortifies and relaxes.

GREEN: Calms nervous system, fortifies and relaxes vision.

TURQUOISE: Regenerates, calms sudden pain, relaxes intellect.

BLUE: Promotes peace and tranquility, opens conscious mind.

MAGENTA: Harmonizes emotions.

CHROMATHERAPY SYSTEMS

We connect the lights to the massage installation for a dependent chromatherapy system, which is controlled from the main keypad. It can also be controlled from a separate keypad or an air push button, for an independent chromatherapy system.

Both systems work with their own electronic control, for easier maintenance.
