

Dignity + Ease + Comfort

SB5 TubDipper

Bath time for children is important in several areas: hygiene, intimacy, the exercise of play and simply should be an opportunity to feel safe and relaxed.

The Showerbuddy TubDipper is a new lightweight yet secure aid to assist both the parent and caregiver of a child with daily bathing in the tub.

The TubDipper is of course a useful aid to any child but is particularly useful for children with special needs.

Bathing is an activity that can involve a great deal of lifting and bending over in positions that can be very stressful to the parent's and caregiver's back. This is where the TubDipper can help you.

Product features include:

- 100lb weight capacity
- Maximum measurement: 27"
 - From bottom of buttocks to mid-ear
- Fire retardant polyester mesh hammock
- Waist and crutch harness
- Corrosion and mold resistant
- Folds flat for easy storage and fast drying
- Padded neck rest
- Sturdy construction
- Padded leg rest
- Low maintenance
- Chest belts
- Comes fully assembled

No more heavy lifting and straining.

Lower your child into the tub easily and safely.

The TubDipper reduces lifting stress and back strain on parents and caregivers while effortlessly setting the child down into the warm tub water in a semi reclined / seated position. After bath time the child is effortlessly lifted out of the tub again with the TubDipper – no heavy lifting or back strain.

For children with poor sitting balance needing some trunk support while being bathed the TubDipper is ideal. The TubDipper removes the need of the parent or caregiver to hold on to the child with one hand and wash him with the other, because the child is safely secured into the comfortable polyester mesh sling of the TubDipper. Both hands are free to enjoy bath time, to wash, to play without fear of the child slipping under the water. At no time should a child be left unattended in a tub, even when the child is safe and secure in the TubDipper.

Safe and secure, happy bath times.
