Liftavators are designed to provide elevator service, up to 50 feet, in new and existing residences where space and economy are prime considerations.

Built to ASME/ANSI A17.1 Section 5.3, Liftavators are built to the same rigid specifications required of full-sized commercial elevators. This ensures that they can meet the needs of the most demanding applications.

Liftavators are installed in completely enclosed fire-rated hoistways to meet applicable building codes. Doors and gates are fully interlocked for maximum safety. Built with components of proven design and manufacture, Liftavators are safe, reliable and easily maintained.

**GENERAL SPECIFICATIONS**

<table>
<thead>
<tr>
